

Portugal's Requirements

The requirements were the sights,
smells of the towns' life, and
the country's topography
which builds the truth of beauty,
reality and history.

The ascent to Portugal's heights is defined
by religion, business, education, agriculture,
technology, and other touchable requirements.
The facts of our main trip
were on the central roads and
collected historical information:
about the truth of this great nation.

We hear it from their children,
mothers and fathers; grandparents tell us
in the longer signs, yes religion is that stamp
of early history that shines everywhere,
such as Hinduism, and Christianity broken up into
Protestantism, Catholicism, Baptists and others.

Portugal rose above what
I intended to see, hear, touch and smell.
